

TOGETHER, LET'S MAKE THE FUTURE CIRCULAR

Are you a motivated maker, full of energy and perseverance, ready to challenge the status quo? Are you curious and always keep people at the heart of your work? Join us and drive sustainable change in medtech and pharma.

Erdmann Solutions is committed to create solutions that generate value for users while being mindful of its impact on our planet. Our commitment to innovation and sustainability drives us to lead the pharmaceutical and medtech industry in environmentally conscious design and development.

We are looking for a passionate and strategic sustainability designer to join our team and contribute to our mission.

YOUR PROFILE

- Healthcare expert: Experience in the pharma and medtech industries
- Proactive thinker: Think ahead and anticipate needs and challenges
- Maker: Turn creative ideas into reality and develop groundbreaking solutions
- Circular concept development: Strong skills in developing innovative concepts and creating sustainable solution in engineering, branding and product development
- Committed: Dedication and ownership of your work
- Visionary: Visualizing and building new ideas
- Risk taker: Willing to take risks to push boundaries
- Forward-thinking: Always looking ahead and ready to take the next step

RESPONSIBILITIES

- Take ownership of projects and drive them forward with commitment and passion
- Collaborate with cross-functional teams to integrate various design elements
- Experience and enthusiasm to participate in all phases of innovative design process, from early-stage to design freeze
- Create sustainable design solutions across engineering, branding, and product development
- Balance quality, time and budget
- Research in the field, prepare and run user feedback
- Know-how in the highly regulator medtech/pharma market

QUALIFICATIONS

- Established experience in design, minimum 3 years
- Relevant degree in design
- Excellent software skills
- Fluent in English and German

Go for it! Please send us your application.
